New Jersey Automobile Insurance Risk Exchange Webinar

The New Jersey Automobile Insurance Risk Exchange will be offering an educational webinar on Tuesday, November 9, 2021 at 2:00 p.m. EST.

The purpose of the webinar is to better acquaint all carriers with your statutory reporting requirements to achieve NJAIRE compliance. It is particularly important since approximately ten (10) carriers are audited annually to assure compliance, and the audit results are shared with the Commissioner of Banking and Insurance. It has been our experience that carriers who regularly sent staff to our previously offered seminars and those who've participated in our recent webinars achieved favorable audit results. The webinar allows for all personnel responsible for NJAIRE operations to participate without incurring additional expenses.

There is no cost for the webinar. During the presentations, attendees will be provided with an overview of NJAIRE, a review of reporting requirements and their financial impact, and an explanation of auditing guidelines. All we require is that you pre-register for the webinar, prior to November 1st, by notifying both John McBride (NJAIRE General Manager) and I with the following information:

- Name of each participant
- Job responsibility (i.e., Claims, Accounting/Finance, Statistical, etc.)
- Participant phone number
- Participant e-mail address

Your registration information should be sent to gmanager@njaire.org AND njairecentralprocessor@iso.com. Shortly after submitting the information, you will receive an email confirming your registration.

Once the registration process is closed, all participants will receive an email notification providing instructions and all relevant information on how to join the webinar on November 9th.

Registrants can expect the webinar to last about an hour and a half, allowing additional time for Q&A.

In an effort to offer more value to your experience, we welcome your suggestions on the type of content you would like to learn more about. If you have a specific topic of interest, please make sure to comment when submitting your registration.

If you are unable to participate in this session, you will have an opportunity to participate in 2022. A recording of the webinar will be placed on the NJAIRE website. Please feel free to contact me if you have any questions (P: 201-469-2323).

Best regards,

Michael McAuley
